Office Action Summary

Art Unit: 1761

Restriction to one of the following inventions is required under 35 USC 121:

Group I, claim 1, drawn to a method of inhibiting pathogen growth in meat classified in class 426, subclass 316.

Group II, claims 2 and 3 (formerly claims 31 and 32 as originally filed, and renumbered claims 2 and 3, respectively under 37 CFR 1.126), drawn to a pathogen growth inhibitor comprising carbon monoxide gas classified in class 424.

The inventions are distinct, each from the other because the product as claimed in Group II could be used in methods other than that recited in Group I. For example, not only could the carbon monoxide gas be used to inhibit pathogen growth in foods other than meats, carbon monoxide could be and has been used to retard respiration of fruits and vegetables which increases produce shelf life. It could also be used as an inert gas to prevent oxidation of oxygen sensitive products, edible or inedible.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art, requiring separate searches, as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined, even if the requirement is traversed (37 CFR 1.143).

Applicant is also referred to the decision Granting Petition mailed May 25, 2001, paper no. 4. The Decision notes that applicant's transmittal indicated that 54 pages of

Art Unit: 1761

specification were filed but only 24 pages (numbered 1-24) are present in the Office file copy. Also, applicant's preliminary amendment filed September 13, 2000 paper no. 7 states that claims 1-13 and 31 and 32 remain in the application. No claims numbered 1-30, or any other number are present in the Office filed copy as filed with the specification. The Decision of May 25, 2001 accepts claims 1, 31, 32 presented in the Preliminary Amendment as presently pending claims. Since no other claims are present, these are the only claims pending in this application.

Clarification and/or correction of both of these points is requested. For example, is part of the specification unintentionally missing and, if so, what affect does this omission have on enablement?
